21st August 2023.

Dear Shareholder,

EnviroMission Limited ("The Company") wishes to advise Shareholders that it has terminated the Agreement between Dewan International Limited, DP Solrenergy India Private Limited ("SOLRE") and the Company.

A termination notice was served in accordance with the Agreement after SOLRE failed to commence construction of the first SCT in India within 18 months from entering the Agreement, being 14 February 2022.

The termination has immediate effect, and the Company will now commence negotiations with alternative partners in India, with the appropriate credentials, to advance the deployment of the Company's technology.

Further updates on these negotiations will be provided in due course.
